

THE GROUND SOLUTION WITHOUT FOUNDATIONS

Sol-R System

This system allows you to equip your unused floor space without the need for foundation work. You can freely orientate your power plant to maximise its production without any fixing constraints.

Special features

- Optimise your yield by orienting your photovoltaic modules without constraints
- Ballasted system without foundations to avoid altering the ground
- Secure installation on the ground
- Easy maintenance and cleaning of the panels
- Ideal solution when the installation of concrete or piles is not feasible
- A tarpaulin prevents the growth of vegetation that could create shaded areas
- Our solutions are designed and manufactured in France.

Technical features

Area of application	On compatible ground
Tilt of the support	10° ou 15 ° (tailor-made according to the project)
Material	Magnelis®
Type of modules & Orientation	Framed - Landscape
Mounting	Concrete or vegetal ballast
Grounding	VERITAS test report
Warranty	10 years

Our sales team is at your disposal to study your projects
