Special features

- ADVANTAGE® is a system designed to adapt to all flat roofs.
- Its modular character facilitates the layout and the rail system allows longitudinal adjustment and transversal.
- A fixing system adapted to your roof: Ballast with tray for gravelled and vegetated terraces or ballast
- The installation of the system preserves the watertightness of your roof.
- The ADVANTAGE® system is compatible with the high wind zones by connecting all the rails in order to obtain a solid structure on the whole of the terrace.
- Our solutions are designed and manufactured in France.

Technical characteristics

Roof type	Inaccessible concrete / vegetated / gravelled roof up to 5°. Complies with DTU series 43.
Altitude	900m max
Support tilt	10° or 15 °
Orientation	South or East-West
Material	Steel Zm 310 Magnelis®
Weatherproofing	Cyclonic area resistant
Module type & Orientation	Framed - Landscape
Fixation	Ballast
Grounding	VERITAS test report
Warranty	10 y
Certification	ETN

Our sales team is at your disposal for the study of your projects
