Special features

- By installing CARPORTS you can optimise and make the most of your space by producing energy for self-consumption or resale.
- Our solutions are adaptable to the architecture of your environment.
- Set yourself apart from your competitors by offering your customers protection against rain and warmth all year long.
- Watertightness is ensured by our system Profil Evolution.
- This system is a powerful image vector and will be at the service of your environmental communication by giving real visibility to your commitments.
- The work is carried out without interrupting your activity.
- Our solutions are designed and manufactured in France.

Technical characteristics

Project design	Eurocode calculation of the structure according to geographic area
Material	Hot-dip galvanized steel
Weather resistance	Cyclonic zone suitable
Polyvalence	Adaptable module format thanks to the flexibility of the Profil Evolution system
Foundation	Foundation by pre-sealing plate
Module orientation	Portrait or landscape mode according to installation instructions
Guarantee	10 years
Grounding	VERITAS test report
